

Q1 2026

January – March 2026 · 1 change

Every episode of My Weird Prompts is written, voiced and assembled by an automated pipeline. This changelog records its major updates — new models, new voices, new stages — and the first episode each one produced. Small prompt tweaks happen weekly and are not listed.

7 January 2026 · Voices · Pipeline V4

The voices come in-house

Chatterbox now runs on the show's own Modal GPUs instead of a hosted API. Every episode since has been voiced this way.

- Switching from Chatterbox Turbo to Chatterbox Regular cut TTS hallucinations (garbled or invented audio) by about 95%.
- Each host's voice is pre-computed and cached, and an episode's lines are spread across parallel GPU workers. Voicing an episode went from about 36 minutes to about 10.

FIRST EPISODE: [#183 The Multi-Billion Dollar Metal We Leave Underground](#)
